EXPERIENCE

Hanifa Darul Hidayah   Yogyakarta, Indonesia
Mobile Developer   October 2024 - Now

- **[Muallim Hanifa](#)**
  - **Muallim Hanifa Attendance App:** A mobile application designed for teachers/instructors at Hanifa Darul Hidaya to record attendance.
  - **Location-Based Attendance:** Enables teachers to mark their attendance only within the designated location of the institution, ensuring accurate and reliable attendance records.
  - **Comprehensive Attendance Records:** Provides a complete monthly record of attendance, including presence, lateness, permission, and sick leave.
  - **User-Friendly Interface:** Designed with an intuitive interface for easy navigation and efficient attendance management.
    Tech Stacks : Javascript, React Native.

Kelurahan Tirtohargo   Yogyakarta, Indonesia
Mobile Developer   October 2022 - October 2024

- **[E-Tirta.app](#)**
  - Engineered E-Tirta.app, a mobile application simplifying the process of submitting administrative documents for community members.
  - Designed and implemented a robust feature set supporting diverse administrative letter submissions from citizens to village staff.
  - Emphasized user-centered design principles, creating an intuitive and accessible interface optimized for users of all technical abilities, including senior citizens.
    Tech Stacks : Javascript, React Native.

- **Tirta Admin**
  - Developed Tirta Admin, a mobile app streamlining citizen data management for Tirtohargo village staff.
  - Designed a search system enabling quick and precise retrieval of resident information.
  - Integrated a family mortality record management feature.
    Tech Stacks : Typescript, React Native

EDUCATION

Pondok IT Yogyakarta   Yogyakarta, Indonesia
Mobile Developer   May 2021 - October 2024
